

Battery charger for RCR 123/RCR 123A/16340 batteries

Seller should give the charger with the following -

Features-

1. The battery charger should be compatible with 3.7 V battery RCR123/RCR 123A/16340.
2. The battery charger should have European standard plug.
3. Automatic current selection based on battery capacity.
4. Capable of charging two batteries simultaneously (two charging slot).
5. Automatically stops charging process when charging is complete.
6. Reverse polarity protection and short circuit prevention.
7. Over-discharge battery activation.
8. Overtime charging protection.
9. Designed for optimal heat dissipation.
10. Made from fire resistant, flame retardant PC material.

Specifications-

1. Input voltage: Ac 100~240 V 50/60 Hz DC 9~12 V
2. Output voltage: 3.7 V \pm 1%
3. Output current: 500 mA

Note- A sample of battery charger must be submitted at the time of Tender.
