

“L70 GUN”

**QUALITY ASSURANCE PLAN/ACCEPTANCE TEST
PROCEDURE**

OF

Item SHAFT ACTUATING LEVER

Drawing No. 5047139

GUN CARRIAGE FACTORY

A GOVT. OF INDIA ENTERPRISES, MINISTRY OF DEFENCE

(A UNIT OF ADVANCED WEAPONS AND EQUIPMENT INDIA LTD)

QAP/ATP

This quality assurance plan is a general guide to meet the quality requirements of product. It consists of applicable procedures (describing production processes, inspection & testing instructions), applicable workmanship standards, the measurement tolerances applicable, the description of material standards and so forth. It also mentions the list of documents, test certificates that will be submitted by firm to GCF along with finished component.

1. Nomenclature & Drawing No.:

SHAFT ACTUATING LEVER 5047139

2. Dimension & Tolerance:

As per relevant IS/BS/BIS standard etc. mention in drawing of item/component. In case of assembly or subassembly drawings the type of fit should be follow as per relevant drawings. Angular or linear attachment or fitting at any location should be as per drawings.

3. Material & Heat Treatment Condition:

As mentioned in drawing no. BS:970 Pt-1-1983 grade 070M20 ®

3.1 Test/Checks and Acceptance criteria for Material.

SL. NO	TEST/CHECK	PARAMETER	ACCEPTANCE/AS PER APPLICABLE SPECIFICATION
1	Chemical composition	Composition	As per Standard/Specification mentioned in drawings
2	Mechanical properties	Tensile Strength	As per Standard/Specification mentioned in drawings
		Yield Stress	As per Standard/Specification mentioned in drawings
		% Elongation	As per Standard/Specification mentioned in drawings
		Hardness	As per Standard/Specification mentioned in drawings
		Impact strength	As per Standard/Specification mentioned in drawings
		Load Test	As per Standard/Specification mentioned in drawings

3	Environmental impact test	Corrosion test, Oil /grease résistance, Water Resistance test, etc.	As per Standard/Specification mentioned in drawings
---	---------------------------	---	---

3.2 Manufacturer has to supply one test piece from bulk of material used for manufacturing along with item/component etc. supplied to GCF for testing as per specification. (Factory may check chemical/ mechanical and other properties whenever required)

4. Method of manufacture *:

4.1 Manufacturer has to strictly follow the Scope of Design and Manufacturing if given in the drawing.

4.2 Item/component made by casting/machining/forging /welding etc. should meet the dimension, tolerances, surface finish, surface treatment etc. as specified in drawing. If there is any ambiguity in relation to drawing of items/components/specification, then he has to consult the GCF factory before mass production of item/component.

4.3 Manufacturer has to specify the method of manufacturing of items/components/assembly/subassembly like Casting/Forging/Machining/Welding etc. other operations used so that final outcome has specified chemical and mechanical properties. During and after machining, all dimensions and surface finish should be maintained as per specified drawing/standards.

5.0 Inspection: Following methodology is to be followed for inspection.

5.1 Mode of Inspection & Sample Size/Selection:

5.1.1 At Firm Premises: A team from GCF end will be deputed for Inspection of material/components/items at firm premises. Sample from bulk quantity will be selected by the team and will be send for inspection at NABL/GOVT laboratory for testing's as per specification. The bulk quantity before dispatch will be sealed and sign by the team and Firm representative. The manufacturer will also provide 100% pre inspection report of item /components/material along with the lot of material supplied As per input material inspection SOP.

5.1.2 At Receipt End: Inspection at GCF end will be done by Material inspection department as per sampling plan specified in IS standard 2500 part-II, 1965. Selected sample from bulk will be tested in GCF laboratory or any other NABL/GOVT lab to ensure the quality as applicable. Firm has to provide sample of raw material used for manufacturing along with each lot supplied. As per AWEIL input material inspection SOP.

5.2 Visual Inspection

S.NO.	DETAILS OF FEATURE	ACCEPTANCE CRITERIA
A	All Sharp Edges & Burrs	To be rounded off/chamfered and burrs to be removed
B	Surface finish.	Rust /pit marks not allowed and coating & plating is to be applied as per standard in drg.

The visual condition of item supplied by vendor should be in acceptable condition and free from corrosion, rust and other environmental impact. The item /component surface or subsurface supplied should be free from pits, cracks, flaws and other defects which may affect its functionality in future.

5.3 Dimensional Inspection:

All dimensions (critical, major & minor in nature) & geometrical features of drawings are to be covered in check sheet and should be duly inspected by concerned quality control section. Components, having dimensions as per drawing, should only be accepted by inspectorate. No deviation in dimension or in geometrical feature is permitted. Latest and calibrated measuring instrument with high accuracy as possible to be used for measurement. If computerized measuring machine like coordinate measuring machine etc. are used for measurement their details along with tolerance and least count to be provided along with the report or mentioned in report.

6. Other Test on Semi-finished/finished Component.

6.1 Details of tests /check on Semi-finished/ finished items and acceptance criteria:

S No.	TEST / CHECK	SAMPLE SIZE	ACCEPTANCE CRITERIA
A	Hardness Test (In process Inspection)	100%	If applicable, Hardness Within Specified hardness Range as per Standard.
B	Surface Treatment /Coatings	100%	As per standard if applicable
C	Environmental /Corrosion test	As applicable	If applicable as per standard specified

6.2 It is to be ensured by vendor that item/component /material supplied having homogeneous chemical/mechanical/physical properties and having uniform surface coating/ treatment /hardness throughout the cross section as mentioned in relevant drawing/standard or specification.

6.3 Surface treatment as per specification to **Y-053** mentioned in drawing.

7. List of Documents:

(To be submitted by firm along with finished component during factory end inspection)

- (1) Pre inspection report of material/component/item as per specification and standard mentioned in drawing.
- (2) Certificate of conformity by supplier if applicable.
- (3) Vendor should submit dimensional report of material/item/component along with details of instrument and their tolerances as applicable as per Para 4.3 (sample 100%)
- (4) In material test report Heat treatment process and condition should be clearly mentioned and as per specification mentioned in drawing,
- (5) Material Chemical/Mechanical/Physical/ Microstructure/Load test report as per relevant standard and specification mentioned in drawings of supply order from authorized GOVT/NABL /DGQA Laboratory.
- (6) Vendor should ensure at least 90% reliability of item/component.
- (7) Guarantee/ Warranty certificate as per relevant supply order.
- (8) Life testing/Reliability report for items like bearings etc. as applicable for items which are specially designed or developed for GCF factory.

8. Important Note:

- (1) Hardware items of best trade Quality to be used.
- (2) Final authority of acceptance is based on the Fit for Trial (FFT) report of item/material/component.
- (3) Use rust preventative after integration, location specified as per drawings specification; if applicable.
- (4) If any query arises pertaining to dimensions, standards (viz. mechanical properties, chemical composition, Heat treatment etc.) or any other aspects which are mentioned in QAP but the same is mismatched with actual drawings/standards, then the firm should intimate GCF with details explanation. The commencement of bulk production only be initiated after the proper clarification received from GCF Jabalpur.
